SAFETY PROTOCOLS

HOW TO STOP COVID-19 FROM GETTING INTO THE SCHOOL:

- Parents should perform a wellness check of each student daily including: temperature, cough, shortness of breath, headache, fatigue or loss of ability to smell or taste.
- Make certain all families report potential exposures and self-quarantine.

HOW TO PREVENT THE SPREAD OF COVID-19:

- Maintain a six foot distance from others in hallways or classrooms and face all desks forward.
- Use face masks or shields when in groups or hallways.
- Frequent hand-washing, sanitizing of hands and often touched surfaces.
- Schedule lunches and recesses in small groups to encourage social distancing.
- Create one-way traffic flow for entering and exiting building.

HOW TO REMOVE POTENTIAL POSITIVE CASES:

- Staff and students must remain home if a body temperature of 100.4 degrees or higher is recorded.
- If a student tests “positive” for COVID-19 the student’s entire household, teacher and class must self-quarantine for 10 days. Students will receive school work and instruction online through Microsoft Teams.
- If a student tests “positive” for COVID-19 they must receive a “negative” test result before returning to school. A doctor’s note is required to verify 72 hours has passed since recovery or at least 10 days have passed since first symptoms appeared.
